Benefits of Vocational Knowledge Library

The vocational knowledge library provides a diagnostic process. Program sequence is goal-based, projected outcome is determined early in program. Patient performance directs patient progress.

With a built-in document management system, the Vocational Knowledge Library provides on demand access to community resources, business and job-search etiquette.

Patient progress is traceable through diagnostic assessment of vocational program goals. Patients learn to be self-starters and become accountable for their return-to-work process; which therefore fosters holistic rehabilitation within the patient.

Weekly access to the vocational knowledge library privies patients hands on experience with developing basic computer skills.

Settings for internet searching are customized, so you can always be sure that your patients have direct access to the information needed.

Chat room allows for more communication between patients and service providers. With personal remote login, counselors can respond to patient questions anytime/anywhere.

Built in Spanish version is a great tool for many patients that speak little English.

Increase Marketability with Vocational Services

The Vocational Knowledge Library acts as a marketing tool for targeting work hardening work conditioning and pain management patients.

Practice can market In-House Computer training as apart of rehab package!

Ability to establish Return-to-Work goals early in the program.

Excellent peer-to-peer interaction and results.

Vocational counselor meets with patients for weekly session; patients work on vocational assignments throughout the week.

The ability to track patient progress provides with proven results, Vocational Knowledge Library can help guarantee patient extensions and acquire more time to offer vocational services.

State of the Art- Customized Technology.
